CODE RED CONSULTANTS

PROFESSIONAL EXPERIENCE

Peter Harrod is a professional fire protection engineer and is a Principal with Code Red Consultants. Mr. Harrod's primary responsibilities over his 18 year career include providing fire protection and life safety code consulting services to clients such as building owners, architects, and general contractors to help ensure compliance with local, state, and federal codes and standards. His experience includes the development of prescriptive code compliance strategies as well as performance-based and alternative design approaches to help solve unique and complex fire and life safety related issues. He also often communicates with regulatory officials such as building and fire officials to present code compliance strategies on projects. Mr. Harrod has significant experience performing existing building evaluations, preparing comprehensive fire protection and life safety reports for new and existing buildings, and reviewing architectural/engineering drawings for code compliance with fire and life safety codes and standards. In addition to code consulting services, Mr. Harrod has experience in the development of construction safety plans as well as serving as the smoke control special inspector.

Mr. Harrod has provided fire protection engineering and life safety code consulting services on a variety of projects including college and university campus buildings, athletic facilities, federal government buildings, manufacturing facilities, high-rise office and residential buildings, laboratories and pharmaceutical buildings, shopping malls, and other mixed use buildings. His work has spanned private developments as well as local, state, and federally funded projects. Mr. Harrod has worked on projects having total construction costs ranging in size from one million dollars to two billion dollars.
